

WHAT IS THE DS2200 SERIES FOR HEALTHCARE?

Dependable, affordable and purpose-built for healthcare

The DS2200 Series for Healthcare gives your staff the power to get it done right, whether they are admitting a patient, administering medication, collecting a specimen or performing inventory and dietary management. Unlike general purpose scanners, the DS2200-HC Series can withstand constant disinfecting and easily and accurately reads the many kinds of barcodes commonly used in hospitals. Available in corded and cordless models, the DS2200-HC Series improves patient safety and boosts staff productivity—without compromising on performance or features for price.

WHY SHOULD YOU BUY THE DS2200-HC SERIES?

TOP 5 CUSTOMER BENEFITS

1

The industry's first and only value-tier, disinfectant-ready scanner.

Your cleaning protocols require clinicians to frequently sanitize devices used at the point-of-care to control the spread of infection for better patient outcomes. And with the DS2200-HC Series you get the industry's only value-tier scanner that is purpose-built for healthcare with special disinfectant-ready housing that can withstand frequent wipedowns with a range of popular sanitizers. As a result, you can protect both your patients and your bottom line.

2

Purpose-built for you.

Your mission-critical operations deserve a specialist, not a general-purpose scanner. The DS2200-HC Series provides everything you need for healthcare applications and point-of-care use. Its disinfectant-ready housing can handle frequent sanitizing. A Do Not Disturb Mode is ideal for sound-sensitive environments. It's preconfigured for the healthcare applications you use every day, enabling you to use your scanners right out of the box. And the DS2200-HC Series is designed for easy integration with your tablet-based EMR applications.

3

Empower clinicians to provide the best in care.

At the point-of-care, clinicians should focus on their patients, not the scanner. Zebra's exclusive PRZM software decode algorithms easily and accurately enable first time, every time capture of the most challenging barcodes—including dirty and damaged barcodes, barcodes on patient wristbands, IV bags, specimen trays and more. And an innovative aim line guides clinicians to scan at the ideal distance from the barcode.

4

The convenience of cordless without the headaches.

When you choose the Bluetooth DS2278-HC for your workflows, you get industry-leading technology that you can rely on. Full-shift battery power ensures clinicians won't waste valuable time recharging a battery mid-shift. Unlike competitive solutions, the long-lasting battery will likely never need replacement. And you can count on reliable charging over the life of the scanner with Zebra's exclusive Connect+ Contact Technology.

5

Get more value with DataCapture DNA.

The DS2200-HC Series is powered by DataCapture DNA, a set of unique development, management, visibility and productivity tools. 123Scan and Scanner Management Service strip away the complexity for scanner deployments of any size. Industry-first Scan-to-Connect app lets you pair a cordless DS2278-HC with any Bluetooth-enabled device with a single scan. Wi-Fi Friendly Mode ensures your Bluetooth scanners won't interfere with your Wi-Fi network. And much more.

APPLICATIONS

Healthcare

- Positive patient identification
- Patient administration
- Medication dispensary: at patient bedside, in pharmacy, on discharge
- Medication administration, authentication
- Medication tracking: pharmacy and pharmacy cart
- Patient wristbands
- Patient IV bag
- Specimen tracking
- Electronic healthcare record access
- Blood product administration

ROI

- Improve the quality and efficiency of patient care
- Increase patient safety with disinfectant-ready, healthcare-specific housing
- Easy to deploy and manage— with both corded and cordless models
