

WHAT ARE THE LI3608-ER/LI3678-ER ULTRA-RUGGED SCANNERS?

Unstoppable performance for extended range 1D scanning.

In warehouse aisles and outdoor yards, the success of your business rests heavily on the scanners in the hands of your workers. Introducing the ultra-rugged corded LI3608-ER and cordless LI3678-ER extended range linear imagers — a new class of handheld scanners built to deliver the unstoppable performance you need in your most demanding business environments. These linear imagers provide lightning-fast capture of any 1D barcode in virtually any condition, nearer and farther than any scanner in this class — from 2 in./5.1 cm to as far as 56 ft./17.1 m away. The ultra-rugged design is practically indestructible, and unrivaled management tools reduce management time and costs to a new low.

WHY SHOULD YOU BUY THE LI3608-ER/LI3678-ER?

TOP 5 CUSTOMER BENEFITS

1

Drive productivity and customer service to a new level.

When you put the LI36x8-ER in the hands of your workers, they can dependably scan 1D barcodes in virtually any condition as fast as they can pull the trigger — including paper barcodes on the uppermost shelves of warehouse racks (up to an industry-best 56 ft./17.1 m away), as well as extra-wide codes just a hands-length away. And that means greater productivity, lower labor costs, faster delivery times and higher customer satisfaction.

2

A next generation platform — at a price you can afford.

Are you using older long range laser scanners in the warehouse or yard? Now you can upgrade to a next generation long range 1D scanner that is far superior to any device in its class. With the LI36x8-ER long range linear imager, you get the best rugged specs, a superior scanning range, best-in-class management tools, a higher capacity battery that delivers more than twice the scans per charge — all at a price point that rivals that of laser scanners.

3

Over 700,000 users can't be wrong.

Over 700,000 Zebra LS3408-ER/LS3578-ER long range 1D scanners have been sold in the last 10 years and are in use in some of the world's toughest industrial environments. Zebra invented handheld scanning and holds thousands of patents that make Zebra scanners the best in the business. When you choose the LI36x8-ER, you can expect the most rugged platform and the best long range 1D scanning performance in the industry — period.

4

A single platform for all your industrial scanning needs.

With 14 different corded and cordless models, the 3600 Series meets the needs of virtually any industrial use case, from long range scanning to high density codes, freezer use and DPM. You get one platform for all your ultra-rugged scanning needs to simplify management, upgrades, accessories and more. All models share the key pillars of the 3600 Series: a superior rugged design, best-in-class scanning performance and range, and easier management.

5

DataCapture DNA simplifies the entire scanning experience.

Zebra DataCapture DNA apps provide powerful new features that no other competitive product can offer — features that not only make the 3600 Series the best in the industry, but also the easiest. With remote management, visibility, productivity and app development tools, DataCapture DNA strips away the complexity for scanner deployments of any size. And Zebra OneCare service sets the bar for device support, covering literally everything for just pennies a day.

APPLICATIONS

Warehousing/Distribution

- Picking
- Forklift operations
- Receiving and putaway
- Shipping
- Cross-docking
- Reverse logistics
- Yard management

ROI

- Improved productivity
- Improved throughput
- Faster customer service
- Lower TCO with ultra-rugged design
- Reduced management time and costs
