WHAT IS THE TC21/TC26 TOUCH COMPUTER?

The ultimate cost-effective touch computer built for small and big business.

If you're considering purchasing low-cost mobile phones for your workers, step up to the TC21/TC26 Touch Computer — without stepping up in price. You get all the right business features you need to improve workforce productivity and task accuracy, reduce total cost of ownership and increase return on investment. You get the right features, the right ruggedness and the right business class accessories, all at the right price. And with multiple configurations at different price points, you pay only for the features your application requires.

WHY SHOULD YOU BUY THE TC21/TC26?

TOP 5 CUSTOMER BENEFITS

1
Have it your way.

You don't want to pay for features you don't need. That's why the TC21/TC26 offers more options than any device in its class. Choose WWAN/WLAN or WLAN only models. Customize your devices for the right level of scanning: scan-intensive, light to moderate or none/occasional. You can pick standard or extended batteries. Configure your devices with the right amount of RAM/Flash memory to support your application needs today and tomorrow. And more. You can configure the perfect solution for your workers, application needs — and budget.

2
So much more than a cell phone.

With support for Zebra's industry-leading Mobility DNA, the WLAN TC21 and WLAN/WWAN TC26 offer value well beyond a mobile phone. Many powerful complimentary Mobility DNA tools are pre-loaded and ready to use, making it easy to get your devices up and running, capture and send data to your apps, keep your devices secure and more. The optional Mobility DNA Enterprise License unlocks additional voice and data tools, taking voice functionality and productivity to the next level — and making it even easier to secure and manage devices.

3
More ways to capture more kinds of data.

You've got a choice of two optional enterprise-class scan engines for the lightning fast capture of virtually any 1D/2D barcode — regardless of condition. For scan-intensive 1D/2D applications, choose the SE4710 for faster-than-ever barcode capture. For light to moderate 1D/2D scanning, choose the SE4100. And if you just need every-now-and-then barcode capture, the high resolution 13MP camera in the base model can do the job.

4
Accessorize to make your workers more productive.

With an unmatched enterprise accessory family, you can create the perfect mobility solution for your needs. Easily manage any size device pool in any environment with single and multi-slot device chargers and cradles, and spare battery chargers. We offer a variety of holsters and carrying options. There's a snap-on/snap-off trigger handle for more comfortable scanning. A wrist mount accessory creates a wearable solution for the warehouse. And more.

5
Guaranteed security every day your device is in service.

You are investing in a device that you plan to keep in the hands of your workers for years to come. The TC21/TC26 offers the lifecycle you need. Available with Android 10 today, the TC21/26 provides built-in support for a future Android release. And Zebra's LifeGuard™ for Android™ (included with your cost-effective Zebra OneCare SV Support Service agreement) provides up to six years of security updates for Android.
