

WHAT IS THE TC52-HC TOUCH COMPUTER?

The ultimate in touch computing for healthcare.

From the leader in enterprise-class Android touch computers, Zebra introduces the TC52-HC, offering the ultimate in touch computing for today's healthcare workers. You get the simplicity of Android with all the mobile computing, clinical collaboration and data capture features your staff needs to provide every patient with the highest quality care. And you get the ultimate technology advancements and innovative software solutions on a cutting edge platform, enabling you to maximize the benefits of mobility today, with the future proofing you need to serve your business and patients tomorrow.

ZEBRA

WHY SHOULD YOU BUY THE TC52-HC?

TOP 5 CUSTOMER BENEFITS

1

Eliminate the guess work in selecting the right device.

Don't worry about premature device obsolescence. The TC52-HC is the most advanced mobile computer Zebra has released, delivering long-term functionality and longevity. The latest Qualcomm chipset assures a minimum of two Android OS upgrades. This multi-task-oriented platform can run all your data and voice applications today and is equally ready for cutting-edge applications like machine learning and Artificial Intelligence (AI).

2

Built for long-term reliability.

The TC52-HC is designed to endure the rigors of everyday clinical use for maximum uptime and a low total cost of ownership. Medical grade, disinfectant-ready plastics and a purpose-built design reduce the spread of germs. IP65 sealing withstands jetting water and dust, while its proven rugged construction withstands 4 ft./1.2 drops to the floor. The TC52-HC delivers dependable performance, in spite of the inevitable spills, drops and bumps — so your staff can focus on taking care of patients, and not their device.

3

You've got a trusted partner in Zebra and our large partner ecosystem.

We committed to Android in 2011 and have the industry's largest, most diverse portfolio of Android mobile computers, along with the most mature suite of productivity and development tools. In 2017, our Android global market share was 64%. When you choose Zebra, you get a partner with a deep understanding of Android, along with a complete range of healthcare scanners, printers and supplies.

4

Mobility DNA for an unmatched feature set — and value.

Zebra Mobility DNA provides powerful new features that no competitive product can offer — features that boost productivity, simplify app management and integration. And with LifeGuard for Android (available with a Zebra OneCare contract), you can count on Zebra to provide additional years of OS support — including security patches — to extend the life of your investment and let you decide when to upgrade to a newer version of Android, even over-the-air.

5

Maximize device uptime and business ops with optional Zebra Services.

Zebra's services help design, integrate, deploy and support your solution today and into the future. Zebra OneCare Support Services deliver unmatched technical support and repair services. OneCare Visibility Services provide critical device data, like insight into device utilization by location. And Zebra Professional & Signature Services put all the pieces together for a successful design, deployment and implementation.

APPLICATIONS

Healthcare

- Voice calls through the PBX
- Push-to-talk (PTT) inside and outside the four walls
- Secure text messaging
