

OVERVIEW

Zebra® ZQ600™ Series Mobile Printers

The ZQ600 Series takes the highly popular QLn platform and makes it even better — adding advanced technology and innovative design that drive productivity, ease-of-use and manageability to a new level. Available in three models: the 2” ZQ610, the 3” ZQ620 and the 4” ZQ630 models, along with healthcare versions, the ZQ600 Series offers the latest technology to refresh the product line — now even with RFID*, maintain Zebra’s leadership position and provide a future-proof device that will grow with your customer’s business.

Features & Benefits

Top 3 Customer Messages

1 The latest wireless capabilities for peak wireless performance

- Superior network reliability and stability — reduces connection failure and its impact on productivity
- Only device in its class to support 802.11ac Wi-Fi and industry-standard 802.11r fast roaming
- Eliminates related tech support calls
- Provides a future-proof platform with the latest wireless technology
- PrintSecure makes it easy to use secure connections to protect data and networks

2 Superior battery power and power management technology

- The highest capacity in its class, with 33% more capacity than the QLn
- Patented Power Smart Print Technology™ reduces power consumption by 20 to 30 percent
- Sleep mode with instant wake-up over Wi-Fi and Bluetooth reduces power consumption when idle
- PowerPrecision+ simplifies and reduces the cost of battery management and ensures only healthy batteries are in the battery pool

3 Built for maximum uptime

- Many features and mechanical design improvements deliver long-lasting durability
- Superior remote management capabilities simplify every aspect of management, from setup and troubleshooting to issue resolution
- Remote printhead diagnostics for easy monitoring of the printhead
- PowerPrecision+ real-time battery health statistics help ensure that printers always have ample battery power to complete a shift

Additional Differentiating New Features

Print DNA — only from Zebra

- Unique combination of productivity, management, development and visibility tools maximize the value of the ZQ600 Series

Zebra-only Ethernet Cradle

- Zebra’s ZQ600 Series and QLn are the only mobile printers that support an Ethernet docking cradle for easy remote management

Large color display

- It’s easy to set up and maintain the ZQ600 Series with its large, easy-to-read color display and customizable menu

Robust memory for future-proof platform

- Offers significantly more RAM and Flash memory to support firmware upgrades and new Print DNA tools for years to come

*ZQ630 RFID model only.

What’s New

Better wireless performance

With 802.11ac and industry-standard 802.11r fast roaming, the ZQ600 Series offers the latest wireless technology.

High-resolution color display

The ZQ600 Series offers a better user experience with a color display, crisp icons and intuitive alerts.

33% higher capacity PowerPrecision+ battery

The high capacity PowerPrecision+ battery lets workers do more on a single charge and is easier to manage.

Instant wake-up over Wi-Fi and Bluetooth

The ZQ600 Series automatically wakes up from stand-by mode; workers don’t have to deal with slow boot times during their shift.

Larger memory footprint

Plenty of memory to support firmware expansions for many years to come.

Secure connections

With Print DNA’s PrintSecure, customers can count on secure connections to protect data and network infrastructure.

New modern Asian fonts

Increases product versatility, supports more markets.

RFID* Technology

Print and encode RFID tags and labels when and where you need them. RFID calibrate only once when using the same media type.

Industry Applications

Retail

- Shelf edge labels
- Mark down labels

Manufacturing / Warehouse

- Pick and Pack Labels / List
- Raw Materials

Transportation & Logistics

- Receiving
- Put Away

Healthcare

- Mobile specimen collection
- Blood bank management

Competitive Highlights

Following are the top competitive selling points for the major competitive products.

Note that the complete detailed and most current competitive information is located in the Competitive Portal.

Honeywell PB22/PB32

Light in printer management options.

Zebra offers superior printer management capabilities through Print DNA powered by Link-OS — including Printer Profile Manager Enterprise and managed visibility services. Only Zebra offers remote management through an Ethernet Cradle, as well as both printhead and battery diagnostics for remote management of these two critical elements.

Unclear portfolio strategy. Honeywell is currently losing market share in this space. Their product line includes a mix of legacy Intermec and DataMax O'Neill printers, resulting in an inconsistent user experience and implementation complexities.

Lower battery capacity. ZQ600 Series offers best-in-class power your customers can count on, with the highest battery capacity in its class, Zebra's patented Power Smart Print Technology and PowerPrecision+.

Light in wireless connectivity. Zebra printers are known for leading the market in wireless technology. Honeywell PB22/PB32 printers only support 802.11b/g (802.11 a/b/g/n for ETSI). And only the ZQ600 Series supports industry-standard 802.11r fast roaming.

Honeywell RP2/RL3E/RL4/RL4E

Light in printer management options.

Zebra offers superior printer management capabilities through Print DNA powered by Link-OS — including Printer Profile Manager Enterprise and managed visibility services. Only Zebra offers remote management through an Ethernet Cradle, as well as both printhead and battery diagnostics for remote management of these two critical elements.

Unclear portfolio strategy. Honeywell is currently losing market share in this space. Their product line includes a mix of legacy Intermec and DataMax O'Neill printers, resulting in an inconsistent user experience and implementation complexities.

Lower battery capacity. The ZQ600 Series offers best-in-class power your customers can count on, with the highest battery capacity in its class, Zebra's patented Power Smart Print Technology and PowerPrecision+.

Light in wireless connectivity. Zebra printers are known for leading the market in wireless technology. RP2, RL3E and RL4E printers only support 802.11a/b/g/n (Wi-Fi is an option for RL3E). And only the ZQ600 Series supports industry-standard 802.11r fast roaming.

Toshiba B-EP2DL/B-FP3D/B-EP4DL

Light in printer management options.

Zebra offers superior printer management capabilities through Print DNA powered by Link-OS — including Printer Profile Manager Enterprise and managed visibility services. Only Zebra offers remote management through an Ethernet Cradle, as well as both printhead and battery diagnostics for remote management of these two critical elements.

Lower battery capacity. The ZQ600 Series offers best-in-class power your customers can count on, with the highest battery capacity in its class, Zebra's patented Power Smart Print Technology and PowerPrecision+.

Light in wireless connectivity.

While Zebra printers are known for leading the market in wireless technology, the Toshiba printers only support 802.11b/g/n. And only the ZQ600 Series supports industry-standard 802.11r fast roaming to keep on-the-move workers connected.

No RFID model available.

Zebra offers the only RFID mobile printers on the market.

Brother RJ-2150/RJ-3150/RJ4230

Light in printer management options.

Zebra offers superior printer management capabilities through Print DNA powered by Link-OS — including Printer Profile Manager Enterprise and managed visibility services. Only Zebra offers remote management through an Ethernet Cradle, as well as both printhead and battery diagnostics for remote management of these two critical elements.

Lower battery capacity. The ZQ600 Series offers best-in-class full shift power your customers can count on, with the highest battery capacity in its class, Zebra's patented Power Smart Print Technology and PowerPrecision+.

Light in wireless connectivity.

While Zebra printers are known for leading the market in wireless technology, the Brother RuggedJet printers only support 802.11b/g/n. And only the ZQ600 Series supports industry-standard 802.11r fast roaming to keep on-the-move workers connected.

Qualifying Questions

Q Are you interested in boosting the productivity of your workforce?

A In high-frequency use cases, just a few extra seconds per print job can have a significant impact on productivity. The ZQ600 Series offers the state of the art features and performance required to boost productivity — including an instant wake-on over Wi-Fi; faster, higher-quality printing; best-in-class battery power; the fastest, most dependable wireless connections inside the four walls and an easy-to-navigate color display. Now with RFID* technology, your team can print and encode RFID labels and tags anywhere. RFID calibrate only once when using the same media type to save additional time and eliminate errors.

Q How long do you need to keep your mobile printers in service? Are you looking to invest in a platform that can meet your business needs today and tomorrow?

A Your needs today will likely change tomorrow — and new technologies can open up new doors to improve productivity, customer service, revenue and profitability. With support for Zebra Link-OS and the Print DNA family of tools, the latest wireless technology and a robust memory platform, you can count on the ZQ600 Series to meet the needs of your business, today and tomorrow. The result is a mobile printing solution you can build on — one that will last many years into the future, delivering an extraordinary return on investment.

Q Does your IT organization spend a lot of unproductive time supporting your mobile printers?

A Unique Zebra-only features and device management options bring a new level of simplicity and cost-efficiency to printer management. The ZQ600 Series is powered by Link-OS, Zebra's robust printer operating system, the foundation for Print DNA, a combination of productivity, management, development and visibility tools. Armed with the many Print DNA value-add tools, your IT organization will be more efficient and effective, able to resolve printer issues and perform device administrative tasks in less time. You'll enjoy a faster Return on Investment (ROI) through the ability to better manage devices to minimize downtime — as well as reduce the incidence and associated costs of No Trouble Found tickets.

*ZQ630 RFID model only.

Supplies & Accessories

Ensure consistent, outstanding quality to increase customer efficiency and productivity. Zebra Certified Supplies result in less wear and tear on printers and increase longevity. Zebra offers the widest selection of in-stock RFID labels ready to ship within 24 hours, designed for and tested with Zebra printers, as well as Zebra RFID readers. Standard and custom label supplies provide a recurring revenue stream, as well as an opportunity to continually connect with your customers.

Accessories:

The ZQ600 Series is compatible with QLn accessories for a cost-effective upgrade. Key accessories include:

- Single-bay and quad-bay Ethernet cradles for charging and remote management
- Multi-slot battery chargers
- Carrying options including soft case, hand strap and shoulder strap

Objection Handling

Operations Manager	Operations Manager	Technology Decision Maker: Purchasing
<p>“My current mobile printers work well enough — why would I replace perfectly good printers if I don’t have to?”</p>	<p>“I am concerned about durability. Is the ZQ600 Series rugged enough for my application and environment?”</p>	<p>“I need concrete proof that a new printer purchase is justified, especially compared to competitive products.”</p>
<p>Response:</p> <p>Your older printer likely lacks the technology required to stay competitive. The latest features will allow users to work faster and smarter, and get more done in a shift.</p> <ul style="list-style-type: none"> • The latest wireless connections deliver faster, more reliable and more secure printing — protecting sensitive data • Best-in-class battery capacity means no need to change batteries during a shift • When the printer needs attention, it’s easy to show users what to do through the large color display • With the industry’s only instant wake-up over both Bluetooth and Wi-Fi, the printer is always instantly available • Everyday a-to-z management is easier with Link-OS and Print DNA • Backwards-compatibility with QLn accessories means QLn customers won’t need to buy new accessories or rebuild their settlement room • Reduce errors and save time by printing/encoding RFID* tags and labels at the point of application 	<p>Response:</p> <p>The business tough ZQ600 Series is built for all-day use in indoor applications like retail, healthcare and warehousing.</p> <ul style="list-style-type: none"> • You get technology you can count on with a well-proven heritage — there are more than one million QLn printers in use today, and the ZQ600 Series is built on the QLn foundation • Includes all the durability improvements made to the QLn Series — including over-molding, a tempered-glass display and seamless one-piece design • A higher-grade resin provides greater impact resistance, improving durability • Multiple mechanical design improvements have been made to the ZQ600 Series to further increase robustness • Need more durability? Zebra offers other mobile printers with higher rugged specifications, such as the ZQ500 family (also available in an RFID model), designed for use outside the four walls 	<p>Response:</p> <p>Class-leading ZQ600 Series printers are the ultimate future-ready investment. You get unmatched value today, and the peace of mind that your mobile printer will grow with your business for years to come.</p> <ul style="list-style-type: none"> • Fastest wireless speeds — the ZQ600 Series are the only printers in their class to support 802.11ac and the 802.11r fast roaming standard • Industry’s only instant wake-up over Wi-Fi • Highest battery capacity in its class and patented Zebra technology enables workers to do more on a single charge • More than enough memory to support firmware upgrades and new Print DNA tools for years to come • Everyday a-to-z management is easier with Print DNA powered by Link-OS • Backwards-compatibility with QLn accessories means QLn customers won’t need to buy new accessories or rebuild their settlement room • Reduce errors and save time by printing/encoding RFID* tags and labels at the point of application
